

Annual Report 2024

Strengthening Rural Livelihoods and Climate Resilience

1. About Resilient North Uganda

Resilient North Uganda (RNU) is a community-based development organization working to strengthen livelihoods, enhance food security, and build climate resilience among smallholder farmers and vulnerable households in Northern Uganda. Our work focuses on climate-smart agriculture, improved seed systems, farmer training, and inclusive rural development.

2. 2024 Program Focus

In 2024, RNU focused on laying strong institutional and programmatic foundations while piloting farmer-centered interventions aligned with climate resilience and sustainable agriculture.

Key thematic areas:

- Climate-Smart Agriculture (CSA)
- Good Agricultural Practices (GAP)
- Improved seed access
- Farmer capacity building
- Community resilience and livelihoods

3. Key Activities & Achievements (2024)

- Conducted **farmer sensitization and training sessions** on GAP and CSA principles
- Promoted **use of improved and climate-resilient seed varieties**, particularly maize
- Supported **farmer groups and local associations** through technical guidance
- Strengthened partnerships with local stakeholders and farmer organizations
- Developed project concepts aligned to donor priorities in climate resilience and food security

4. Geographic Coverage

- Northern Uganda (with emphasis on Acholi and Sebei sub-regions)

5. Institutional Development

- Strengthened internal governance and management systems
- Developed core policy documents and reporting templates

- Established digital presence through the RNU website and communication platforms

6. Financial Stewardship

RNU maintained prudent financial management practices in 2024, ensuring transparency and accountability in the use of limited operational resources while preparing for scaled donor-funded programming.

(Detailed financial statements available upon request.)

7. Looking Ahead to 2025

In 2025, RNU aims to expand farmer outreach, deepen partnerships, and mobilize funding for large-scale climate-smart agriculture and livelihood programs.
